Vitis vinifera L.
in vitro nutrition 295
carboxylation efficiency chlorophyll fluorescence photosynthetic capacity quantum yield stomatal conductance 417
glutamate dehydrogenase 1223
Voltage clamp
current-voltage curves transmembrane reductase ferricyanide ferrocyanide *Chara* 1559
Wall extensibility
Phaseolus vulgaris leaf growth extension rate root cooling turgor 1319
Water balance
mineral nutrition bitter-pit apple xylem phloem transpiration 645
Water content
Glycine max (L.) Merrill solution culture duration of seed growth dry matter accumulation 243
Water oat
gall formation cytokinin *Zizania latifolia* tRNA smut fungus 277
Water potential
gas phase rain roots root age soil temperature 409
tomato *Lycopersicon esculentum* Mill. germination rate seed priming genetic variation 1441
Water relations
non-uniform salinity citrus 35
Water status
cotton sunflower temperature 1585
Water stress
P-V analysis *Solanum melongena* 661
faba bean nitrogen nutrition 1207
temperature photosynthetic seedling 1595
Waterlogging
aerenchyma alcohol dehydrogenase flooding *Spartina patens* hypoxia 223
Weibull function
seed germination rate cardinal temperatures faba bean probit and logit scales 1423
Wheat
chlorophyll fluorescence electron transport photo-inhibition protein phosphorylation thylakoid membranes *Triticum aestivum* 113
pericarp photosynthesis 303
Triticum aestivum electron transport light harvesting thylakoid membranes protein phosphorylation photosystem 2 761
carbon assimilate redistribution 949
salt ion transport I genome barley 1095
callose microtubules sieve elements sieve plates 1507
Wheat embryo
transient expression particle bombardment *Triticum aestivum* L. 1161
Wheat root growth
yield threshold cell wall extensibility temperature turgor pressure 669
White clover
storage carbohydrates remobilization regrowth 573
Trifolium repens defoliation protein synthesis nodules 1245
Trifolium repens defoliation nodules enzymes antibodies 1255
X-ray analysis
calcium manganese 1143
X-ray microanalysis
Dendryphiella salina marine fungus salt tolerance 199
Xylem
mineral nutrition bitter-pit apple phloem transpiration water balance 645
Xylem–phloem exchange
radial transport 631
Xylem transport
Hordeum vulgare phloem transport NaCl-stress 1133
Yield potentials
environment growth thermal units pearl millet 1609
Yield threshold
cell wall extensibility wheat root growth temperature turgor pressure 669
Zea mays
hexachloroiridate (IV) hexabromoiridate (IV) hexacyanoferrate (III) plasmalemma redox membrane potential 1055
soil drying ABA leaf growth *Helianthus annuus* L. 1125
cytokinin zeatin riboside metabolism translocation 1517
cytokinin zeatin nucleotide biosynthesis seed 1525
Zeatin
Crocus sativus L. explants NAA saffron 47
Zeatin nucleotide
Zea mays cytokinin biosynthesis seed 1525
Zeatin riboside
Zea mays cytokinin metabolism translocation 1517
Zimbabwe
Brachystegia Hill reaction photosynthesis 919
Zizania latifolia
gall formation cytokinin tRNA smut fungus water oat 277
Zoospore
Pythium aphanidermatum recognition encystment mucilage root monoclonal antibodies polysaccharides 693
